

Teaching Anatomy is now easier than ever with A.D.A.M. Interactive Anatomy Life.

A.D.A.M. Interactive Anatomy (AIA) Life is a customizable online educational resource designed to enhance the way students learn about anatomy and physiology, and alleviate the strain of building comprehensive curriculums. With access to thousands of high-quality, detailed medical images and built-in assessment exercises, AIA Life provides instructors the perfect tool for developing stimulating and rigorous anatomy courses. AIA Life is suitable for use by high school, college, nursing, and medical students, as well as allied health programs.

List of Features:

- Dissectible Anatomy
- Atlas Anatomy
- Clinical Illustrations
- Clinical Animations
- Lab Exercises
- Anatomy Tests
- Curriculum Builder
- Online Student Lab Activity Guide

AIA Lite lets you:

Dissect anatomy, layer by layer:

- Slice through detailed, full-color illustrations of male and female bodies, using precision point-and-click, to view and identify over 20,000 different anatomical structures.
- Study over 500 pinned Atlas Anatomy structures.
- Browse through over 150 pinned cadaver prosection photographs and radiographic images.

Understand anatomy in a clinical context:

- Access over 700 clinical illustrations and animations that depict a diversity of disease states, injuries, first aid responses, surgical procedures, and more.

Improve anatomy recognition with Lab Exercises:

- Practice identifying key anatomical structures using drag-and-drop questions that cover over 950 structures in 11 different body systems.
- Receive a detailed performance summary and score report.

Reinforce knowledge with Anatomy Tests:

- Create and customize tests using over 15,500 structure and identification questions on 7 key anatomical regions to assess students' knowledge of anatomical structures.

Develop a dynamic curriculum with Curriculum Builder:

- Combine and incorporate the wealth of resources and interactive features in AIA to create unique and pertinent student activities and presentations.
- Use the Annotation Tool to add specific labels, text, leader lines, and other annotations to images from Dissectible Anatomy, Atlas Anatomy, or Clinical illustrations, and save the images to your hard drive.
- Incorporate modified images into Curriculum Builder projects or use outside of AIA.

Assign Online Student Lab Activities:

- Assign activities to students from 11 prebuilt Curriculum Builder projects or use the activities as a template for creating your own projects or presentations.

Support English as a second language (ESL) learners:

- Translate structure names using the 11 unique language lexicons.

Access learning material anytime, anywhere:

- Connect online to AIA from virtually anywhere, without the hassle of software requirements or license codes.

AIA LITE FOR THE ENTIRE LEARNING INSTITUTION

AIA Lite is the perfect online resource for students. Through a site-wide or concurrent user license, students can access AIA Lite from any computer, either on or off campus. Use the online student version in conjunction with the instructor version to build a completely integrated curriculum.

LIMITED BUDGET FOR ADDITIONAL STUDENT RESOURCES?

For less than the price of a printed textbook or anatomy atlas your students can have access to their own individual subscription. Through our Student Materials Adoption Program (SMAP), students qualify for a 20% discount off the cost of AIA Lite when instructors make AIA Lite a required resource for their course. The SMAP program allows instructors to place this powerful resource in the hands of their students at a lower cost, while qualifying for their own free subscription!

Ask us how you can take advantage of this program today!
