

A.D.A.M. Interactive Anatomy is your most comprehensive resource for teaching anatomy and physiology.

A.D.A.M. Interactive Anatomy (AIA) is a customizable online educational resource designed to enhance the way students learn about anatomy and physiology, and alleviate the strain of building comprehensive curriculums. With access to thousands of high-quality, detailed medical images, AIA provides instructors the perfect tool for developing stimulating and rigorous anatomy courses. AIA is suitable for use by high school, college, nursing, and medical students, as well as allied health programs.

List of Features:

- Dissectible Anatomy
- Atlas Anatomy
- Clinical Illustrations
- Clinical Animations
- 3D Anatomy
- Medical Encyclopedia
- Curriculum Builder
- Online Student Lab Activity Guide

AIA lets you:

Dissect anatomy, layer by layer:

- Slice through detailed, full-color illustrations of male and female bodies, using precision point-and-click, to view and identify over 20,000 different anatomical structures.
- Study over 500 pinned Atlas Anatomy structures.
- Browse through over 150 pinned cadaver prosection photographs and radiographic images.

Understand anatomy in a clinical context:

- Access over 700 clinical illustrations and animations that depict a diversity of disease states, injuries, first aid responses, surgical procedures, and more.

Develop a dynamic curriculum with Curriculum Builder:

- Combine and incorporate the wealth of resources and interactive features in AIA to create unique and pertinent student activities and presentations.
- Use the Annotation Tool to add specific labels, text, leader lines, and other annotations to images from Dissectible Anatomy, Atlas Anatomy, or Clinical illustrations, and save the images to your hard drive.
- Incorporate modified images into Curriculum Builder projects or use outside of AIA.

Explore 3D Anatomy models:

- Search through 8 fully-interactive, labelled, high-resolution 3D models of human organs. 3D models make it easier for students to visualize and learn about complex anatomical structures.

Dig deeper into health sciences with the Medical Encyclopedia.

- Browse through 3,600 articles, containing medical illustrations, videos, and slideshows that cover a multitude of diseases, conditions, symptoms, tests, and surgeries.

Assign Online Student Lab Activities:

- Assign activities to students from 11 prebuilt Curriculum Builder projects or use the activities as a template for creating your own projects or presentations.

Support English as a second language (ESL) learners:

- Translate structure names using the 11 unique language lexicons.

Access learning material anytime, anywhere:

- Connect online to AIA from virtually anywhere, without the hassle of software requirements or license codes.

ASSESSMENT RESOURCES AVAILABLE FOR PURCHASE TO BUNDLE WITH AIA

Lab Exercises:

- Practice identifying key anatomical structures using drag-and-drop questions that cover over 950 structures in 11 different body systems.
- Receive a detailed performance summary and score report.

Anatomy Tests:

- Create and customize tests using over 15,500 structure and identification questions on 7 key anatomical regions to assess and reinforce students' knowledge of anatomical structures.

LIMITED BUDGET FOR ADDITIONAL STUDENT RESOURCES?

For less than the price of a printed textbook or anatomy atlas, your students can have access to their own individual subscription. Through our Student Materials Adoption Program (SMAP), students qualify for a 20% discount off the cost of AIA when instructors make AIA a required resource for their course. The SMAP program allows instructors to place this powerful resource in the hands of their students at a lower cost, while qualifying for their own free subscription!

And with the choice of site-wide or concurrent pricing, you can maximize your curriculum dollars even further. Call us today to ask how you can take advantage of these savings!
